Worm is the gripping story of the "Conficker" computer virus- which, since its introduction in November 2008, has infected millions of computers around the world - and the cyber security elites who have joined forces in a high-tech game of cops and robbers to find its creators and defeat them.

### Worm: The First Digital World War: Mark Bowden ...

The subtitle for this book is: The First Digital World War. That's overstating it, to be honest. The book focuses on the creation of the world's largest botnet by a worm called Conficker back in 2008. At its peak, it was estimated to have infected between 9 and 15 million machines, and even as late as 2011 was still on roughly 1.7 million.
